

GARAGE DOORS

WIŚNIOWSKI

GATES | WINDOWS | DOORS | FENCES

SECTIONAL DOORS **UniPro RenoSystem SNP**

Intended use: The sectional garage door is our response to the needs of buildings intended for renovation. A number of design solutions solve a multitude of potential issues that could occur during the replacement of the current garage door.

UNIVERSAL INSTALLATION

Steel panels are made of galvanized sheet, filled with freon-free, hardened polyurethane foam and coated with polyester paint on both sides. This ensures very good thermal insulation and acoustic properties. Each door features a system of flexible and robust gaskets both along the entire circumference and between the panels, which considerably contributes to the insulating qualities of the door.

SAFETY

The safety systems focus on minimizing all traces of risk. Regardless of the method of operation, WIŚNIOWSKI doors ensure comfort and safety. Our products are fully compliant with the PN-EN 13241 standard.

FUNCTIONALITY

The RenoSystem SNP garage door series takes advantage of tracks fitted with pull springs installed along the vertical tracks, which makes it possible to install the door when there is no lintel.

STRUCTURE

The RenoSystem garage door is a UniPro sectional door, which has been designed to accommodate a number of difficult installation scenarios. It is also our response to the needs of buildings intended for renovation. Available in a manually- and a power-operated version.

The system comprises a pull spring system (SNP) installed along the vertical tracks, purpose-designed opening frames in an uninsulated and insulated version in the door leaf colour, which ensures an appealing look of the door without the need to perform additional finishing works. The UniPro RenoSystem door is available in three variants for installation in an opening without a lintel, side clearance or with an uneven wall surface. Thanks to the use of angle bars installed by the opening frame, the opening frame seating position can be adjusted in relation to the opening.

The door leaf is made of special panels with a thickness of 40 [mm]. The high quality of the panel surface finish provides optimum protection from weather conditions and ensures many years of operation. With the broad range of colours and models, the door can be matched to any building façade.

**1 Automation solutions**

Proven and reliable automatic operating units: METRO Smart io, MOTO io or SPARK.

2 Tracks and opening frames

Made of galvanized sheet, they provide a stable and durable structure.

3 Panel hardware in the RAL 9002 colour

The colour matches the panel colour on the inside.

4 Photocells

Prevent uncontrolled door leaf operation when an obstacle is present within the clear passage – optional accessory.

5 Bottom gasket

High quality gaskets perfectly adapt to the shape of the floor and prevent water from penetrating under the door to the inside of the garage.

**Overload safety device**

In automatic doors, the door leaf stops and reverses when the bottom edge contacts an obstacle.

**Double-lip circumferential seal**

Used as standard, it ensures improved sealing of the door.

**Quiet guiding rollers**

They ensure proper running of the door.

**Pull springs**

Spring system responsible for balancing out the door leaf weight. The guaranteed minimum number of cycles: 20,000.

**Special panel shape**

Prevents fingers from being crushed.

PANEL STRUCTURE

Robust and reliable design

We consistently follow the same design principles for our whole range of sectional garage doors. Thanks to our robust and reliable design, you can rest assured that the door will meet even the most extreme requirements and withstand the most demanding operating conditions. Special solutions, such as the original panel built using the **5-ply sheet bending system** ensures stable fixation of elements, which further contributes to the strength of the structure. The top section is fitted with a lip gasket. The inner side of the panel in a colour similar to RAL 9002. Thermal transmittance factor of the panel $U_p = 0.48 \text{ W/m}^2\text{K}$

RIB TYPES

G - without ribs

W - high ribs

N - low ribs

V - V ribs

Film coatings available with garage doors with the panel: G - without ribs or W - with high ribs

HOME INCLUSIVE 2.0 colours

The Home Inclusive 2.0 colour collection combines four product groups: Gates | Windows | Doors | Fences, which provide a consistent design of all the products.

HI EARTH

HISTONE

HISTEEL

HIRUBY

Special colours from the HI palette:

Doors in light colours should be fitted on the side exposed to sunlight. It is not recommended to fit dark colour doors in such conditions, in particular RAL: 3007, 4006, 4007, 5004, 5008, 5010, 5011, 5020, 5022, 6008, 6009, 6015, 6022, 7015, 7016, 7021, 7024, 7026, 7043, 8014, 8019, 8022, 9004, 9005, 9011, 9017, 9021, Anthracite, Nut Brown, Macore, Dark Oak, Swamp Oak, Siena Noce, Siena Rosso, Quartz Anthracite, Summer Cherry, Sapeli, Dark Green, Sheffield Oak Brown, Rustic Oak, Chocolate Brown, Black Ulti-Mat, Brush Schwarzbraun, Umbragrau, Anthrazitgrau. When a dark colour is chosen for doors installed on the side exposed to sunlight, the panels can heat up excessively, which may result in deformation. The door leaf cannot be painted from the inside. When ordering doors in matching colours in different orders (delivery batches), the colour hues can differ due to technological reasons.

INSTALLATION DIMENSIONS

- S_o** - opening width, ordering dimension
- H_o** - opening height, ordering dimension
- N** - minimum required lintel height
- W₁** - minimum required side clearance
- W₂** - minimum required side clearance
- E** - minimum garage depth with clearance under the ceiling

UniPro RenoSystem

This solution comprises a pull spring system (SNP) installed along the vertical tracks, purpose-designed opening frames in an insulated and uninsulated version, as well as fascia panels in a colour matching the door leaf. Available in three versions adapted to different installation conditions.

- Minimum garage door dimensions:
- $S_o = 1,500$ [mm] and $H_o = 1,900$ [mm].

Available range of dimensions for tracks

Opening height (Ho) in [mm] up to	Opening width (So) in [mm] up to													
	2,250	2,375	2,400	2,500	2,600	2,750	3,000	3,250	3,500	3,750	4,000	4,250	4,500	4,750

⁽¹⁾ - Ordering dimension.

Installation dimensions

SN		Installation behind the opening	Installation in the opening
Sj		$S_o - 240$ [mm] + $W_1 + W_2$	$S_o - 240$ [mm]
Hj	manual	$H_o - 320$ [mm] + N	$H_o - 320$ [mm]
	manual + catcher	$H_o - 240$ [mm] + N	$H_o - 240$ [mm]
	with a drive unit MOTO, METRO	$H_o - 220$ [mm] + N	$H_o - 220$ [mm]
	with a drive unit SPARK	$H_o - 240$ [mm] + N	$H_o - 240$ [mm]
Nmin		0 [mm]	0 [mm]
W1min, W2min		0 [mm]	0 [mm]
S		$S_o - 200$ [mm] + $W_1 + W_2$	
H		$H_o - 100$ [mm] + N	
If: $N > 100$ [mm] assume 100 [mm]; $W_1 > 100$ [mm] assume $W_1 = 100$ [mm]; $W_2 > 100$ [mm] assume $W_2 = 100$ [mm]			

So - opening width, ordering dimension. **Sj** - clear passage width after garage door installation. **Ho** - opening height, ordering dimension. **Hj** - clear passage height after garage door installation. **N** - minimum required lintel height. **W1** - minimum required side clearance. **W2** - minimum required side clearance. **E** - minimum garage depth with clearance under the ceiling.

INSTALLATION OPTIONS

Installation using lintel

Installation using frame

Installation behind the opening – fascia panel behind the opening

Installation in the opening – fascia panel in the opening

Installation in the opening – fascia panel in front of the opening

SECTIONAL DOOR INSTALLATION STRUCTURE

This solution makes it possible to install the door when the opening does not meet the product fitting requirements, i.e. when there is no side clearance and no lintel. It acts as a framework. The structure can be customized depending on which area is missing.

Available in a steel version made of galvanized sections, which can be fitted with covers in the door leaf colour, or in an aluminium version with the option of painting the profiles in a RAL colour or finishing with a decor.

Available element configurations

a) SL+SP+SN | b) SL+SN | c) SP+SN | d) SP+SL | e) SN | f) SP | g) SL

SL - left post (steel section 100x40x3mm, width x height x wall thickness)
 SP - right post (steel section 100x40x3mm, width x height x wall thickness)
 SN - fake lintel (steel section structure)
 W1 W2 - side clearance = 100 mm

VERTICAL FASCIA PANELS

Fixed elements made of sectional door panels, finished with aluminium fittings and with a bottom seal in the panel. Available in all colours, structures, and ribs available for sectional doors.

Range of dimensions:

- for widths **360-2,600 [mm]** - height 1,900-3,000 [mm] with panels G, W, V; for heights 1700-3000 [mm] with panel N
- for widths **2,601-3,000 [mm]** - height 1,900-2,600 [mm] with panels G, W, V; for heights 1,700-2,600 [mm] with panel N

RENOVATION FASCIA PANELS

Renovation fascia panels made of steel sheet 0.5 [mm] thick. Cover sections of the installation opening, e.g. damaged during the garage door replacement. Available with silkline, smoothgrain, and sandgrain structures in the door curtain colour. Max. length of a single section is 3,000 [mm] or 4,000 [mm].

GLAZING VISUAL

Aluminium panel without a thermal break with a clear acrylic glass without glazing bars. The door is available with one or two VISUAL panel glazings. Available with garage door widths up to $S_{o} > 3,000$ [mm]. Not available with a wicket door.

GLAZING HORIZON

Aluminium panel without or with a thermal break, for doors $S_{o} \leq 3,000$ without glazing bars, for doors $S_{o} > 3,000$ with a single glazing bar. The Horizon panel height is 215-250 [mm] depending on the total height of the door. The panel is painted on both sides in the colour of the external part of the door. An aluminium panel without a thermal break can be fitted with LED strip lighting.

ALUMINIUM PANEL GLAZING

The UniPro garage door is available with an aluminium panel glazing without or with a thermal break. The panel is fitted with a double acrylic glass - a 21 [mm] glass unit. The garage door can be fitted with one or two aluminium panels.

PORTHOLES/GLAZING

Type A-1

Type A-1 - made of double, clear acrylic glass, with a rough frame surface. The external frame is available in RAL 7016, RAL 8003, RAL 8011, RAL 8014, RAL 8017, RAL 9005, RAL 9016. The internal frame is always white. Internal/external frame made of PVC. External dimensions of the frame: 600 x 270 [mm]. Light transmission 86%.

Type O

Type O - infill: double, opaque acrylic glass; frame: PVC, smooth; external colour RAL 7016, RAL 8003, RAL 8011, RAL 8014, RAL 8016, RAL 9005, RAL 9016, (internal always white). Not available with doors with caisson ribs.

Type O-1A

Type O-2A

Type O-1A, O-2A - infill: triple, clear, acrylic glazing unit; frame (ext./int.): stainless steel, satin. Not available with doors with caisson ribs. Available with doors up to $S_{o} = 3,750$ mm.

Type R-1A

Type R-2A

Type R-1A, R-2A - infill: triple, clear, acrylic glazing unit; frame: stainless steel, satin. Not available with doors with caisson ribs. Available with doors up to $S_{o} = 3,750$ mm.

Type S-2

Type S-2 - unit made of double clear acrylic glass, aluminium frame with external dimensions of 1,066x210 [mm]. The external frame is available in RAL 7016, HI Modern Graphite, RAL 9005, Modern Black, RAL 9016, RAL 8003, RAL 8011, RAL 8014. Internal frame always in RAL 9002.

VENTILATED PANEL

Aluminium panel without a thermal break or with a thermal break, infilled with expanded mesh. The door can be fitted with only one ventilated panel.

GLASS

Intended use: for double glazing of glazed aluminium panels and VISUAL glazing.

No-Scratch

Glass pane with a special coating improving its strength, very good resistance to scratching and sun-light compared to the standard glazing.

Satin

Glass with a milky white tint. Double glazed pane opaque from the outside and clear from the inside. Light transmission 78%.

Glass pane SAN R

Opaque (so-called frosted) double glazed pane clear from the inside. Light transmission (77-79%).

Grey

Clear glass with a slight brown tint. Double glazed pane, clear from the inside, non-coloured from the inside. Light transmission (51%).

LOCK/HANDLE

The lock is fitted with a single-side lock cylinder, the lock cylinder is accessible from the outside (three keys), from the inside the lock is operated with a latch. On the outside of the door leaf, a plastic handle with a cover plate type PVC-1 or KL-2 is fitted. A black plastic handle is installed on the inside. The lock is not available with the handle installed on the outside in the middle part of the door.

The PVC-1 handle is available in black. The KL-2 handle is available in the following colours:

- **MAT** - RAL 9005, RAL 9016, RAL 8014.
- **GLOSS** - RAL 9006, RAL 1036, RAL 1035, RAL 7048.

AUTOMATIC OPERATING UNIT KITS

The METRO Smart io, MOTO io, and SPARK series drive units are dedicated for garage doors and ensure full functionality and overload protection as standard.

The EXTENDED CARE warranty allows you to extend the standard warranty for a complete product – an automatic sectional door – up to 5 years, provided it is factory-configured with the METRO Smart io, MOTO io, or SPARK drive unit.

io-homecontrol is a modern, safe, and reliable radio technology by Somfy, which lets you control your devices compatible with the smart home concept. Thanks to this technology, the drive unit not only receives commands from the controllers, but it can also send feedback. The io-homecontrol technology makes it possible to connect the METRO Smart io and MOTO io drive units to the TaHoma system to provide additional functions, connecting the garage door with smart devices available at home.

WIŚNIEWSKI 868 MHz is a modern SOMIoq2 two-way radio system for controlling garage doors and entrance gates. Thanks to this technology, the drive unit not only receives commands from the transmitters, but it can also send feedback. The SPARK automatic operating units were also equipped with a wi-fi module, which makes it possible to control the gate from an application installed on a mobile device, giving the drive unit additional functionality.

OPTIONAL ACCESSORIES

WALL-MOUNTED TRANSMITTER

The 3-channel transmitter makes it possible to control drive units and wireless receivers.

- Examples of use:
- - full opening/closing the door,
 - - LED lighting under the tracks, and/or under the track fastener,
 - - top panel tilt.

Wireless communication makes it possible to install it in any place and doesn't require any cables.

WALL-MOUNTED TRANSMITTER AMY 1 IO

The single-channel device enables control of the drive unit via the io-homecontrol radio transmission. It features an integrated temperature sensor compatible with the TaHoma ecosystem.

KEYPAD 2 CODE KEYPAD

The 2-channel code keypad makes it possible to control drive units and wireless receivers.

EXTERNAL RADIO RECEIVER io

Makes it possible to control the drive units of other manufacturers using the Pulsar transmitter. It is a two-channel device which makes it possible to program as many as 32 transmitters.

MECHANICAL CARRIAGE LOCK

It is an additional safeguard which increases garage door safety when mounted to the carriage.

SIGNAL LIGHT

Supports the METRO Smart io and MOTO io drive units. Warning function. Orange blinking light indicates that the door is operating.

BACKUP POWER SUPPLY BATTERY

When connected to the METRO Smart io and MOTO io drive, it provides power for several cycles of emergency operation.

PHOTOCELLS

They prevent uncontrolled door leaf movement when an obstacle is present within the clear passage.

* In the case of installation of a UniPro RenoSystem door in the opening (fascia in the opening or in front of the opening), installation of the photocells inside on the frame

OPTIONAL ACCESSORIES FOR THE SPARK AUTOMATIC OPERATING UNITS

2CH WALL-MOUNTED TRANSMITTER

2-channel device which lets you control both your drive units and radio receivers. Communication between the transmitter and the receiver occurs wirelessly, so the device can be mounted in any place. The wall-mounted transmitter has a feedback function that informs the user about the position of the door using a LED.

WIŚNIOWSKI 868 RADIO RECEIVER

It makes it possible to control other drive units with the DART and DART Vibe transmitters, and the wall-mounted transmitter. The radio receiver is a two-channel device operating at the frequency of 868 MHz, making it possible to program up to 40 transmitters.

DART/ DART VIBE REMOTE CONTROL TRANSMITTER

The transmitter makes it possible to control the operation of several drive units. The DART Vibe transmitter has a feedback function in the form of vibration, which is a confirmation that the signal from the transmitter was received.

ENTRAcode+ CODE KEYPAD

Compatible with the WIŚNIOWSKI 868 MHz radio receiver. Control of up to five devices. Power supply: 4 X AA 1.5[V] batteries. IP 54 protection rating. Up to 30 m range. ENTRAcodE+ is a wireless device that does not require any wiring and is designed for surface mounting.

PHOTOCELLS 180

Prevent uncontrolled door leaf movement when an obstacle is present within the clear passage.

SIGNAL LIGHT

Connected to the SPARK drive unit, it has a warning function. Orange blinking light indicates that the door is operating.

CONEX - INPUT BOARD

Additional board with signal, impulse inputs, whose inputs were defined for opening and closing. Compatible with wired Smart Home systems.

OUTPUT - SIGNAL BOARD

Additional board with a signal input. Information about the position of the door: door not open (NO)/door not closed (NC). Compatible with wired Smart Home systems.

LOCK - MOTOR LOCK

A magnetic lock which blocks the drive unit in any position of the door. An additional element able to withstand loads up to 300 kg, increasing door safety.

ACCU - EMERGENCY POWER SUPPLY BATTERY

Connected to the SPARK drive unit, it provides power for several cycles of emergency operation in case of the main power supply outage.

RELAY - ADDITIONAL TRANSMITTER

An additional transmitter with the NO/NC output enabling e.g. switching on lights in the garage and external lights or other electrical devices.

* In the case of installation of a UniPro RenoSystem door in the opening (fascia in the opening or in front of the opening), installation of the photocells inside on the frame

TECHNICAL DATA

	UniPro RenoSystem
Leaf	A panel made of galvanized steel sheet with two-side polyester coating, galvanized and painted on both sides, infilled with high density PU foam $g=42 \text{ kg/m}^3$ without HCFC
Minimum number of cycles	20,000 cycles
Thermal transmittance factor U of the panel [W/m ² ·K]	0.48
Watertightness class	2 in accordance with EN 13241
Wind load resistance class	3 in accordance with EN 13241
Air permeability class	4 in accordance with EN 13241
Sound reduction index Rw [dB] without a wicket door / with a wicket door	23 / 24 in accordance with PN-EN ISO 717-1: 2020
Safety features	The special shape of the panel prevents fingers from getting crushed, optional accessory: photocells.
Optional accessories	Three installation options, electric drive, ventilated panel, glazing with an aluminium panel, VISUAL glazing without glazing bars, HORIZON glazing, portholes, glass panes: No-Scratch, GREY, SATIN, SAN R, ventilation grilles, auxiliary lock, photocells, transmitter.
Maximum width / height of the door [mm]	4,750 / 2,875
Available panel rib designs	low ribs, high ribs, V, without ribs
Available panel structures	woodgrain, smoothgrain, sandgrain, silkline
Available colours:	other RAL, special colours, including wood imitating colours, (film coated panels)
Track type	SNP

CONTROL THE GARAGE DOOR WITH YOUR SMARTPHONE!

TaHoma - Your smart home

The io-homecontrol® system with radio transmission makes it possible to wirelessly connect the METRO Smart io and MOTO io drive units to the smart home controlled by Somfy's TaHoma Switch central control unit. Building a comprehensive smart home provides a number of benefits and additional features that enhance your comfort every single day. The app gives you constant access to the most important functions of the elements of your home.

The WIŚNIOWSKI Connected app - new quality as standard

When you choose WIŚNIOWSKI Connected, you don't need a smart home central control unit. WIŚNIOWSKI garage doors with the SPARK drive unit are ready to connect as standard - you can connect them to the smart home without any additional devices or extra charges. WIŚNIOWSKI Connected uses Wi-Fi instead of radio transmission and the app allows you to control the garage door from almost any place in the world.

Let us inspire you!
