The latest
trend

Uniqueness without limits

Choose your preferred
level of transparency

CE certificate -
safety

- 4 models.
- An uninterrupted line of segments without fence posts. Can be installed on a concrete foundation or below ground line.
- The INFINITY includes fence segments. Add a matching entrance gate and wicket. See how you can combine them into one fence system.

DESIGN YOUR FENCE WITH AW EXPERT

AW EXPERT is a groundbreaking software developed by WIŚNIEWSKI that facilitates the design of a well-thought-out and practical fence including all the functional elements, such as the entrance gate, wicket, segments or posts.

BASIC collection

Sliding gates

What kind of property? A sliding gate needs more space on the sides of the entrance, which is why it will be perfect for properties with a wide front.

Single- and double-leaf gates

What kind of property? They don't need space on the sides, but take up more space between the entrance and the garage. This is why they are recommended for narrow, but relatively long driveways.

Folding gates

What kind of property? They combine the advantages of sliding and double-leaf gates. Thanks to their structure, they don't take up too much space. Perfect for narrow and short driveways.

Gates on wheels

What kind of property? They do not require space in front of or behind the driveway, and thanks to the elimination of the "tail," they also require very little side space. Ideal for smaller properties and for those who appreciate unconventional solutions.

Colours. Textures

Colour is the first feature our senses react to. We made sure that each of our customers can find the exact colour they are looking for. Our gates can be manufactured in RAL palette colours and the unique HOME INCLUSIVE colours – together with our range of textures and additional decorative elements, this gives you hundreds of options for a tailored solution.

Special coating

Standard colours

Special colours

Take advantage of the unique possibilities provided by the original, proprietary WIŚNIEWSKI brand palette: **HOME INCLUSIVE**. It includes over a dozen colours with a metallic finish and stunning 3D depth.

HOME INCLUSIVE 2.0 colours

LOUVRE CUSTOMIZATION

With the louvre customization option in models AW.10.228, AW.10.229, and AW.10.230 (in the gate, wicket or segment), you can add a unique character to your fence.

Panel fences.

Perfectly versatile

WIŚNIEWSKI mesh panel systems are a solution used in places where durability, high quality, and safety are crucial. They can be used in urban areas, industrial areas, as perimeter protection in recreational areas or as a complement to a typical residential fence.

Panel fences include mesh panels, entrance gates, and wickets. Create complete fences and, thanks to original installation systems, get a guarantee of security and durability.

Together or separate? Mesh panels are increasingly used as additions to classic residential fences – for instance only on the sides and back of the property. Economical, safe, and quick.

2D mesh panels

Panel without ribs reinforced with a double wire with a larger gauge.

3D mesh panels

Panels with ribs ensure maximum resistance to deformation.

The method of corrosion protection and the type of material used are responsible for the quality of the mesh panels. WIŚNIEWSKI panels are manufactured using a process that minimizes the occurrence of corrosion for many years and additionally guarantees fence robustness. **Check the quality of the panels before you choose yours.**
