PERGOLA

ECHO is a remarkable solution that connects your home with nature. Open up to the garden, enjoy the fresh air, sunshine, and proximity to nature. The pergola is a functional roof that takes residential buildings, restaurants, and gardens into a new, limitless dimension.

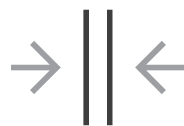

Solid aluminium post.
Guaranteed stability for years to come.

Cover systems:
standard (19 cm in height and 7.5 cm in width) or with a top cover (27 cm in height) concealing the louvres and actuators. For maximum aesthetics.

Integrated drainage system.
Convenient use regardless of the weather.

Wall-mounted
or free-standing

Stable aluminium
structure

Provides air
circulation

10

Up to 10 years warranty

Roof made of aluminium louvres that can be automatically rotated by 110 degrees. Decide how much light you let inside.

Colours tailored to your needs. RAL structural colours and the unique HOME INCLUSIVE 2.0 collection. DuoColour and Decor versions available.

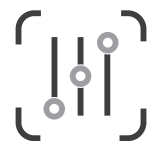

Roof sealing system. You can be certain that your relaxation will not be interrupted by rain.

Protection from
rain and sun

Customization
options

Structure type, dimensions, and louvres of the ECHO pergola

The pergola is available in a wall-mounted version – which will create additional space for the house. The free-standing version can become part of the garden or recreational area. The rotating louvres provide natural air circulation, while also ensuring protection from rain and sun.

free-standing

wall-mounted

Pergola dimensions

Description	free-standing	wall-mounted
Maximum width	4,000 mm	4,000 mm
Maximum depth	6,860 mm	7,010 mm
Maximum height	3,000 mm	3,000 mm

Additional elements

Zip screen sun shades. High-quality fabrics provide protection against sun and insects.

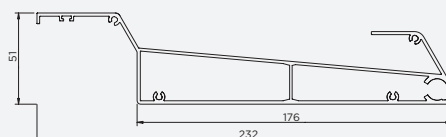

Slide Glass built-in sliding system. Your way of dealing with the changing weather.

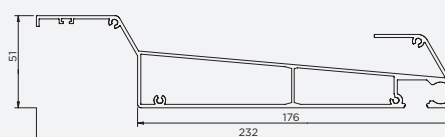

Adjustable LED lighting. Create a unique atmosphere for your guests.

Colours

tailored to your taste

Our pergolas provide you with a wide range of customization options. You can match them to your house, façade, windows, and – above all – to yourself and your expectations. The RAL mat colour palette offers a wide selection of colours – classic, bold, and even extravagant.

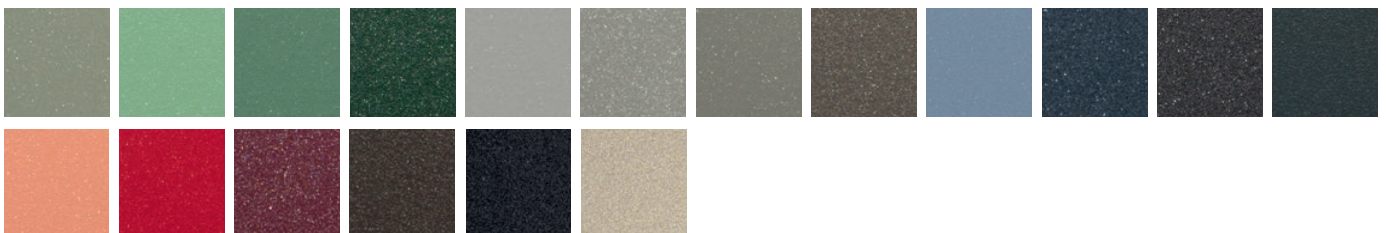

Standard colours

(mat structure)

Take advantage of the unique possibilities provided by the original, proprietary WIŚNIEWSKI brand palette: **HOME INCLUSIVE**. It includes over a dozen colours with a metallic finish and stunning 3D depth.

HOME INCLUSIVE 2.0 colours

For the most demanding projects, we have prepared **the DuoColour service, where structural elements of the pergola have a different colour than the roof louvres**. A **DECOR** colour option is also available. It gives you the possibility to create your dream colour set and match the pergola to the building.

Accessories for your pergola from WIŚNIOWSKI

Various customization options allow the pergola to be tailored to individual needs. Thanks to our range of accessories, you can make it a functional space, accessible regardless of the weather or season.

LED lighting

Soft lighting inside the pergola creates an unforgettable atmosphere during evening relaxation. Take advantage of modern lighting systems: linear side lights or lights installed in the louvres. Use the dedicated app or remote control to adjust the light intensity to your needs and enjoy the perfect conditions for relaxation.

Weather sensors. The weather won't surprise you anymore.

Weather sensors will automatically ensure the safety of your pergola when it starts to rain or snow, or when a strong wind starts to blow. These discreet sensors are mounted on the roof and are not visible when you use the pergola. As soon as the weather turns bad, the sensors will send a signal to the control unit to close the roof and shutters. You no longer need to follow the weather forecast or go outside to make sure your pergola is safe. Regardless of whether the weather changes at night or when you aren't home, you will be prepared for it.

Wind sensor

Temperature sensor

Rain/snow sensor

Infrared radiator

A heater with infrared technology. The main advantage of the device is its high efficiency, allowing heat to be emitted over a long distance. Infrared radiators available with WIŚNIOWSKI pergolas are manufactured using state-of-the-art technology that makes it possible to heat an area of up to 12 m². It is a perfect solution when you want to use the terrace on colder days.

Remote control

The pergola remote control system is an advanced tool that gives you full control over the lighting, heating, and the position of the roller shutters and louvres. All that regardless of the weather conditions or the time of day. The control system is very intuitive and convenient in use. You can use a remote control or a special app for your smartphone.

Integrate with the smart home system and enjoy smart control with a selected TaHoma® switch central control unit.

Find inspiration and bring your dreams to life!

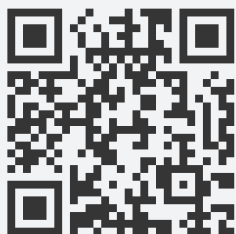

A pergola perfectly suited to your home.

Are you looking for a pergola that is not only functional, but also matches your home in terms of aesthetics? You have come to the right place! Now, you can create a perfect space for relaxation and leisure.
